

UNIVERSITY MISSOURIAN.

VOLUME II.

COLUMBIA, MISSOURI, MONDAY, OCTOBER 11, 1909.

NUMBER 18.

HACKNEY'S KICK WINS FOR TIGERS, 3 TO 0

Missouri Defeats the Kansas Aggies in Hard Fought Contest.

VARSIY MEN IMPROVE

Visitors' Gains Made Around Ends and on Forward Passing.

Just four minutes before the end of the second half, a drop-kick by T. D. Hackney, left halfback, won the football game for the Missouri Tigers against the Kansas State Agricultural College on Rollins Field Saturday afternoon. The final score was: Missouri, 3; K. S. A. C., 0.

Spectators were predicting a tie when the moment came that the team was waiting for. Hackney dropped back to the 35-yard line and opened his hands for the signal. Elliott, the Kansas left end, who had broken up a previous attempt, rushed through again. For an instant it seemed as if the play would be blocked. Hackney turned away from the runner, and dropped the ball on the ground for the kick which won the day.

Tiger Goal in Danger.

Only once did the "Aggies" come within striking distance of the Tiger goal. When danger threatened the rooters rose and cheered and cheered and then cheered more for the Tigers. That cheering helped. The Tigers' line held and held fast. The "Aggies" were forced to kick.

Both the playing and the rooting showed much improvement over that witnessed in the Monmouth game. The weather was more like football weather, too. Long before the game at the start of the game the Tigers kicked off to the "Aggies" who began with a bewildering burst of speed. After a few moments the Kansas quarterback discovered Missouri's weakness and sent his heavy backs around the ends for good gains. Against the line the Kansas could make little headway. Bates outpunted Hackney and the "Aggies" always returned the Tiger back's kicks when the ends were found wanting. Both Hackney and Saunders handled the kicks well. The first half was clearly in favor of the "Aggies." They made consistent gains and were forced to kick less frequently. A greater part of the time the ball was in Missouri's territory, and it was anything but a crowd of confident rooters that watched the Tigers trot to the "gym" when time was called at the end of the half.

Missouri Not Penalized.

Missouri played much faster in the second half. They kicked off to the Kansas and the oval remained in their territory for the greater part of the half. Once the Tigers were close enough for Hackney to try a boot, but the kick was poor. The "Aggies" decided to put the ball in play on the 25-yard line and trust to Bates to kick it out of danger. His kick was poor, and the Tiger march began again. The crowd grew nervous as the game neared the end. Finally Hackney was given another try, which won the game.

Pixlee took Black's place after the first five minutes of play in the first half, and Alexander went in for Dexter in the second half. Sims, the "Aggie" fullback played the whole game with a dislocated shoulder. Twice he jarred it out of place. Once F. A. Ahren, the "Aggies" coach, reset the bone. The second time Sims set it himself while resting after a scrimmage.

Missouri was not penalized once. The "Aggies" offended frequently. It was a 15-yard penalty after Hackney's spectacular run of forty-five yards that resulted in the Tigers' score. Little time was taken out, and the game was played in remarkably short time. The halves were only twenty minutes long, thus giving the rooters little insight as to the physical endurance of the Tigers.

The Line-Up.			
K. S. A. C.	Position.	Missouri.	
Elliott	LE	Idler	
Gingery (Capt.)	LT	Johnson	
Seng	LG	Thatcher	
Zoller	C	Ristine (Capt.)	
Carpenter	RG	W. Roberts	
Roots	RT	Gove	
Towler	RE	Bluck, Pixlee	
Bates	QB	Saunders	
Croyle	LH	Hackney	
Hunter	RH	Dexter,	
		Alexander	
Sims	FB	Clare	

Miss Cora Hitchcock was elected President of the Girls' Mandolin club which was organized last week. Its first appearance in public will be on Halloween night.

FROST WILL COME TONIGHT.

More Cold Weather Predicted for Columbia Tomorrow.

The forecast for Columbia and vicinity is: "Generally fair tonight and Tuesday. Colder tonight with frost."

The temperatures:
7 a.m. 42 11 a.m. 47
8 a.m. 43 12 noon. 46
9 a.m. 45 1 p.m. 46
10 a.m. 47 2 p.m. 47

STOCK JUDGES TO KANSAS CITY

"Aggies" Will Visit American Royal Stock Show.

The dairy judging team of the University of Missouri will leave tonight for the American Royal live stock show at Kansas City. H. P. Davis, Don Magruder, E. G. Woodward and Cleveland White compose the team. Prizes aggregating \$275 were won by the boys at the Missouri state fair last week.

HOLIDAY TOMORROW

Columbus Day Will Be Observed at the University of Missouri.

The first holiday of the school year at the University of Missouri, will come tomorrow, October 12, having been set aside as a legal holiday by

SINCE tomorrow, Columbus Day, is a legal holiday throughout Missouri, there will be no issue of the University Missourian. The next issue of the paper will be Wednesday afternoon.

the last General Assembly in memory of the discoverer of America. It is called Columbus Day.

Dean J. C. Jones, who is acting president in Dr. Eliot's absence, announced that all exercises at the university would be suspended Tuesday.

COLD DRIVING DUCKS SOUTH.

Hunters Say Many Species Will Soon Appear Around Columbia.

The sudden cold spell snap is driving the ducks south, and several Columbia hunters who were out yesterday say that the birds are already plentiful in this vicinity. The flight yesterday was mostly teal but duck hunters here say that with continued cold weather mallard, red-head and other large species should soon be found here in quantities.

The new game law which was passed by the last state legislature providing that every hunter should purchase a hunting license will be rigidly enforced here during the coming season, according to a statement made recently by Jesse A. Tolerton, state game and fish commissioner. According to the new law, anyone hunting in his own or an adjoining county must purchase a county license costing \$1. State licenses costing \$5 will be issued to those who desire to hunt anywhere in the state. Non-resident hunters must procure a non-resident hunter's license, which costs \$25. State licenses will be issued to students desiring them. All hunting licenses expire December 31. They are issued by the county clerk.

BLUES LEAD IN CONTEST.

Arthur Crews Has 31 Memberships to His Credit.

The Blues are ahead in the race for new members in the Y. M. C. A. contest. Up to the present 238 new memberships have been turned in and of these 138 are to the credit of the Blues. Arthur Crews, a private on the Blue team, leads the individual workers. He has thirty-one to his credit.

"He is working systematically night and day, and is already planning his trip to Geneva," said J. S. Moore, the general secretary of the Y. M. C. A. Secret meetings have been held by both teams.

TARGET PRACTICE FOR CADETS.

Captain Tupes Hopes to Improve Marksmanship Here.

Captain Herschel Tupes, commandant of cadets in the University of Missouri, hopes to raise the standard of marksmanship among the cadets. The allowance of ammunition is inadequate, but Captain Tupes plans to have gallery firing during the winter months, followed by range firing in the spring. The range firing will be done with ball cartridges and will follow the rules of the regular army.

Too Cold for High School Classes.

The low temperature in the School of Education high school building this morning caused Prof. J. L. Meriam to dismiss school. The furnace is being repaired and will not be ready until Wednesday morning.

INVITES YEGGMEN TO DO WORK RIGHT

Merchant on Ashland Road Puts Safe on Front Porch of Store.

INSTALLS LIGHT FOR THEM

Many Citizens Afraid to Stay at Home Since Post-office Robbery.

E. D. Allen the only merchant at Deer Park, eight miles from Columbia on the Ashland gravel road, has placed his safe on the platform in front of his store. In the safe he puts his money and valuable papers every night.

Several months ago robbers "cracked" his safe and took the contents. A few weeks later the safe in the Trade Center store at Ashland was blown open and the entire business block burned.

In order to give robbers more light by which to work and to prevent the burning of his store, Mr. Allen rolled his safe out the front door, where it is in plain view of passersby on the road.

A visitor saw the safe and called Mr. Allen's attention to it. He pointed up to a new gasoline gas light he had just installed on the front porch and said:

"I wanted the safeblowers to have a better opportunity to do their work. They have more room on the outside and there is a bright light they can turn on if needed. They will have a better opportunity to get away when the alarm is given."

Since the robbery of the post office a week ago, some of the citizens have been afraid to stay at home. One man nailed down all his windows and his brother-in-law comes at bed-time and sleeps in the house with him.

MONEY LOCKED UP

Boone County National Bank Could Not Open Vault This Morning.

The Boone County National Bank was unable to open its vault this morning, when time came for opening. As a consequence the bank could not use its own money to begin business with. The Exchange National Bank lent it enough money to start on.

The door of the steel-lined vault of the bank is regulated by a time clock. At 5 o'clock Saturday afternoon, the vault was locked and the clock set supposedly for thirty-six hours. Today, however, it did not open until 12:30 this afternoon.

R. B. Price, Jr., cashier of the bank, said that the clock on the vault could be set for as much as forty-six hours and that some mistake had either been made in setting it Saturday night or else the clock had stopped for a time and then started again.

"FIVE-FOOT LIBRARY" UNUSED.

Dr. Eliot's Favorite Books Are Not Popular Here.

The forty volumes of the "Eliot five-foot library," now in the University of Missouri library reading room, so far remain on the shelf uncalled for. The collection of books is complete with the exception of "Fruits of Solitude," by William Penn and the Letters of Cicero and Pliny. These have been ordered.

This "five-foot library" was recommended by Dr. Charles W. Eliot, former president of Harvard University, as all the books needed to obtain a liberal education.

W. K. Stone, assistant librarian, said today: "The 'five-foot library' is receiving little attention from the students, and so far as I know has not proved very popular anywhere. I think that those who make use of it do it more as a fad than for any other reason."

DEDICATION FARMERS' WEEK.

Agricultural Building Will be Formally Opened About Jan. 15.

The new Agricultural Building of the University of Missouri will be dedicated sometime during Farmers' week, about the middle of January. The exact date has not yet been decided on, but the matter has been referred to Dr. A. Ross Hill, president of the University of Missouri. A definite program has not been arranged.

In spite of the cold weather yesterday several students of the University of Missouri climbed to the top of the dome of Academic Hall to view Columbia.

PROF. HIBBARD TO BUILD AEROPLANE

University Man Says Craft Can Be Built for Few Hundred Dollars.

HE SAW CURTISS FLY

Declares No One with Family Should Risk Life in Flying Machine.

Prof. H. Wade Hibbard, of the School of Engineering, purposes to build an aeroplane. He corresponded with the Wright brothers before their flights were made public.

He says any man with mechanical skill should be able to construct an aeroplane for a few hundred dollars, as the gasoline engine is the greatest expense. Mr. Curtiss sold his this week in St. Louis for \$7,500. Mr. Hibbard was given special permission to enter the enclosure and tent where the Curtiss aeroplane was in St. Louis last week and had opportunity to examine it closely.

"As a spectacle," said Mr. Hibbard, "it was splendid. There had been a great deal of wind and rain, but at the time of flight there was a calm. The location was unfavorable, as the trees were too thick. I do not believe there will ever be another trial there. Curtiss Makes Ready."

"Before starting Curtiss adjusted the sparking and tightened the wires. Half a dozen men behind cranked the machine and turned the propeller blades. I knew what was going to happen, but most of the people around had their hats blown off by the tremendous blast. The machine was trundled out into the road on the three bicycle tires, which were about fourteen inches in diameter.

"The Wright machine is different. It soared more majestically than an eagle, because there was no flapping of wings. It flew about half a mile, circled and landed through an opening in the trees, never rising above the tree tops. The landing was without disturbance.

Aeroplanes Always Expensive.

"The reduction in the cost of the aeroplane can never be as great as that of bicycles and automobiles has been, because the work necessary can not be done by machinery. Five years from now aeroplanes will be as common, I think, as automobiles were twelve years ago. The advance in the aeroplane use is going to come from wealthy young fellows who have the daring and money necessary. The aeroplane is still dangerous. A man who has any one dependent on him can not afford to ascend. If I had not been married, I would have owned one long ago.

"From a certain mathematical formula I would say that if some inventor found a means of furling the silk as the speed increased, the aeroplane could be made shorter.

"I can not accept the dictum of the mathematicians who say that the aeroplane will remain a toy. Mathematical calculations have said that the dirigible balloon will take the heavy loads and the aeroplanes the light loads. Mathematics has been wrong in other things, and I do not take much stock in this prophecy."

AGAINST HIS BARN

Property Owners Would Restrain W. L. Wright from Erecting Building.

Property owners have asked the Boone County Circuit Court to issue an injunction restraining W. L. Wright from erecting a mule barn on his property on Tenth Street near Locust Street. The case will be heard tomorrow morning. In the meantime work on the building is being rushed by Mr. Wright.

The petitioners for the injunction are L. A. Weaver, H. E. Weaver, Cassandra Daily, Mary A. Shaw, Mrs. L. A. Sneed, C. M. Sneed, S. A. Smoke, Susie Smoke, G. W. Trimble and Annie Baumgartner.

In the injunction the petitioners claim that the building and keeping of this mule barn will be a nuisance and endanger the health and even the life of the petitioners and their tenants. They also claim that the barn will obstruct the street by extending over the property line on Tenth Street, and that it will greatly reduce the actual and rental value of their property. Mr. Wright could not be seen this morning. His wife said he was "somewhere around the place."

"Find him if you can," was her comment.

FRISKY CALF CAUSES TROUBLE

Did Not Like the Idea of Being Loaded Upon Truck.

A frisky bull calf that refused to be crated created excitement among a score of persons at the Wabash station Saturday morning by taking a notion to see Columbia. While it was being loaded upon a truck, the top of which was open, the calf sprang out of the crate.

Henry Watson, the owner, and several others started in pursuit. The calf kept to the railroad track, and the pursuers had a hard time stumbling over the ties. Several blocks from the station a man tried to stop the animal by waving his hands, but the calf got the signals mixed and ran into a yard on a side street. Here he calmly waited for the pursuers to catch up.

Various suggestions were made by the men for roping the quarry, but no one wanted to play the cowboy. The pow-wow was hurriedly broken up when the calf rushed into the street.

Finally the calf became tired and allowed a noose to be dropped around his neck. Watson bought the calf from Robert Mitchell, of Columbia, and was having it sent to O'Fallon, Mo.

HIGHWAYMEN GOT \$4

S. L. McManaway was Robbed at Old Covered Bridge on Rocheport Gravel.

At the old covered bridge on the Rocheport gravel road last night S. L. McManaway was held up by two highwaymen and robbed of \$4, all the money he had. McManaway is a carpenter in the employ of D. B. Price, of Columbia. He was riding home on a bicycle, carrying a heavy dinner pail, when he saw a buggy standing in the road at the mouth of the bridge.

McManaway did not halt, but attempted to pass. The man standing on the ground grabbed him and threw him from the wheel. McManaway jumped up and knocked the robber down with the pail. The man in the buggy jumped out and struck McManaway a blow in the face which felled him.

The two men then searched McManaway, took his money and drove rapidly towards Columbia, four miles away. This covered bridge was built many years ago. It has been the scene of ghost stories and many negroes are afraid to go through it after dark.

TO INSPECT DINING CARS.

Dr. William P. Cutler Will Investigate Sanitary Conditions on Wabash.

Dr. William P. Cutler, state food and dairy commissioner, is a member of Governor Hadley's party on a ten-day trip which started today through the Ozarks by way of the Current river.

Dr. Cutler has been requested by the Wabash railroad to inspect the dining car service over its system with the view of improving the sanitary conditions of the refrigerators and kitchens. On a recent trip over the Wabash road he found it necessary to order the steward of a dining car to have the refrigerator thoroughly cleaned. Shortly after he received the invitation from the company. He will take up his work upon his return from the Ozarks.

Since Dr. Cutler has no official jurisdiction outside of Missouri, he will make this tour of inspection while on his vacation.

MANY SEPTEMBER WEDDINGS.

Forty-eight Couples Obtained Licenses in Columbia.

Licenses were issued in Columbia in September for the marriage of forty-eight couples. This was more than twice the number for August. The oldest couple to be married were A. J. Lyon, 52 years old, and Mrs. Lee Carr, five years younger.

The youngest couple who took out a license were Miss Leona E. Wade, 16, and A. C. Sims, 18, both of whom had to secure parental consent for the wedding. Miss Della Wyatt, 15 years old, was married to Willard Torode, 27.

Dr. E. H. Schorer Visits Here.

Dr. E. H. Schorer, formerly a member of the faculty of the University of Missouri, left Columbia last night after a short visit. Dr. Schorer is now one of the faculty of the University of Kansas and is practicing medicine in Lawrence.

For High School "Frat" Club.

Alumni members of Phi Lambda Epsilon, a high school fraternity, who are attending the University of Missouri, are contemplating organization. At present there are nearly ninety members here and it is their purpose to organize a social club.

FIVE M. U. TEACHERS ON CARNEGIE LIST

Missouri One of Three State Universities Approved by Foundation.

PROVISION FOR WIDOWS

Maximum Amount of Retiring Allowance Raised from \$3,000 to \$4,000.

Official announcement from the Carnegie Foundation for the Advancement of Teaching shows that only three state universities, the University of Missouri, the University of Wisconsin, the University of Michigan, have been placed in the accepted list of the foundation.

Five professors at the University of Missouri have served as teachers in institutions of higher learning long enough to be eligible to retirement, if they so desire, upon the Carnegie Foundation. Dr. Woodson Moss, professor of internal medicine, who has been at the university since 1879; Dr. W. G. Brown, professor of chemistry, who has been at the university since 1896, but who had served in other institutions nineteen years previous to coming to Missouri; Dr. J. C. Jones, professor of Latin and dean of the College of Arts and Science at Missouri since 1883, but two years previously in other institutions; Prof. M. L. Lipscomb, professor of physics at Missouri since 1889, ten years previous professorship elsewhere; and Dr. E. A. Allen, professor of English at Missouri since 1885, but twelve years in professorship elsewhere.

Dr. Jesse Accepted.

Dr. R. H. Jesse, former president of the University of Missouri, and Dr. A. W. McMaster, former dean of the School of Medicine, were placed on the Carnegie Foundation in advance of the acceptance of this institution by the Carnegie trustees.

Two special recommendations have been made by the executive committee of the Carnegie Foundation to the board of trustees and, having been adopted by the board, have been incorporated in the rules of the foundation. By one of these recommendations the maximum amount of a retiring allowance is raised from \$3,000 to \$4,000, and by the other the executive committee is directed to grant a pension to the widow of a professor in an accepted institution who has been for ten years married to the professor, the pension to be one-half of what the husband would have been entitled to receive. Heretofore the pensions to widows have been only permissive. They have now been raised from discretionary ones to a certain provision by the adoption of the following rule:

Any person who has been for ten years the wife of a professor either in receipt of a pension or entitled to receive one, shall receive during her widowhood one-half of the allowance to which her husband was entitled.

Rules of the Foundation.

The rules for the granting of retiring allowances in force January 4, 1909, are as follows:

A normal retiring allowance is considered to be one awarded to a professor in an accepted college, university or technical school, on the ground either of age or of length of service. The term professor, as here used, is understood to include presidents, deans, professors, associate professors and assistant professors in such institutions of higher learning.

In reckoning the amount of the retiring allowance the average salary for the last five years of active service shall be considered the active pay.

Retiring allowances shall be granted under the following rules, upon the application of the institution with which the professor is connected. Application blanks for this purpose are furnished by the foundation. The ground upon which the application is recommended, whether it is upon the basis of age or upon the basis of service, should be stated in each case.

Retiring Allowances.

1. Basis of Age. Any person 65 years of age, who has had not less than fifteen years of service as a professor and who is at the time a professor in an accepted institution, shall be entitled to an annual retiring allowance, computed as follows:

(a) For an active pay of \$1,200 or less, an allowance of \$1,000, providing no retiring allowance shall exceed 90 per cent of the active pay.

(b) For an active pay greater than \$1,200 the retiring allowance shall equal \$1,000, increased by \$50

(Continued to Page 3.)
